

Topic content analysis report of the top ranking contents for the keyword: how to shave your head

Our goal with this report is to help you understand your topic & competitor better and save you from hours manual research. Postpace topic researcher module fetches top 15 organic results, featured widgets and vital content metrics for your primary keyword and generates an in-depth analysis. Our proprietary algorithms removes all the noises from any page and breaks down the content down to understandable bite size information. Use these information to understand your topic intent and content metrics and plan for one single piece of highest quality content on this topic that yet to exist on the web. This is your shortcut to establish subject matter authority & claim top ranking in search results.

Average word count: 1486 words

Based on the analysis of top 15 organic results from google search, the **#4** ranked article has the highest word count of **6776** words and **#11** has the lowest **32** words.

Average readability level: 8th-9th grade

Based on the analysis of top 15 organic results from google search, the **#4** ranked article has the lowest readability of **7th** grade and **#11** has the highest **10th-12th** grade.

Average keyword frequency: 1 times

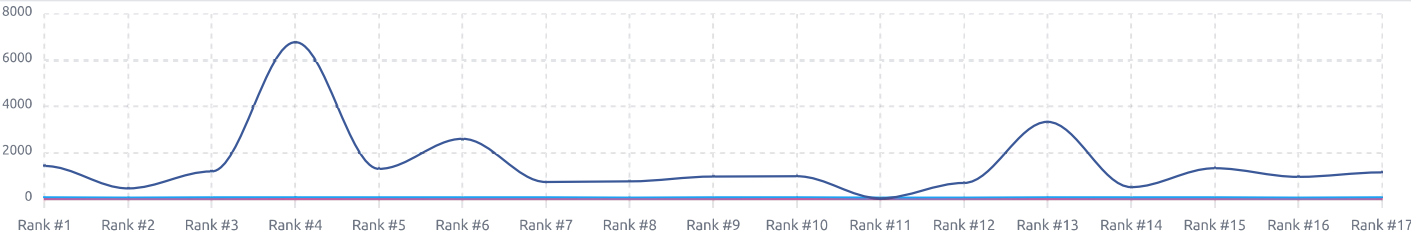

Based on the analysis of top 15 organic results from google search, the **#10** ranked article has the highest usage of keyword **7** times and **#2** has the lowest **0** times.

Competitive analysis of the best contents.
